

## EXAMPLE TRAIL Finland 1: Forest

<b>Name of the trail:</b>	Biodiversity in the forest
<b>How to find it on Avastusrada:</b>	<a href="https://kool.avastusrada.ee/admin/map/biodiversity-in-the-forest">https://kool.avastusrada.ee/admin/map/biodiversity-in-the-forest</a>
<b>Screenshot:</b>	 <p>The screenshot shows a map of a forest area. A trail is marked with six red pins numbered 1 through 6. Landmarks include 'Viikin arbor', 'Viikin lintutorni', 'Hakalan lintutorni', 'Hakalanniemi', 'Purolahden lintu', 'Viikin löytöeläintalo', 'Viikin tutkimuskeskus', 'CoolHead Brew / CoolHead Taproom', and 'Dy Kiviaines'. The map also shows a river and a road labeled 'Viikintie'.</p>
<b>Developer:</b>	Anttoni Kervinen, Arja Kaasinen, Laura Korpela, Tarja Lahtinen, Ulla Laitinen, Sari Saukkonen, Topi Turunen
<b>Addressed age group:</b>	Grades 3–6
<b>Addressed dimensions of biodiversity:</b>	Focus on observing trees and other plants in the forest and their interactions with animals and humans
<b>Relevant topics:</b>	Biodiversity of the forest
<b>General overview and aim:</b>	<p>The aim of the trail is for the students to</p> <ol style="list-style-type: none"> <li>1) make detailed observations of the environment</li> <li>2) practice skills needed to distinguish between different types of forest</li> <li>3) learn about tree growth and reproduction</li> <li>4) engage in thinking of wood as a raw material</li> </ol>

**Framework conditions:**

Time: about 1 hour

Equipment required: Mobile phones or tablets with internet access for all participants

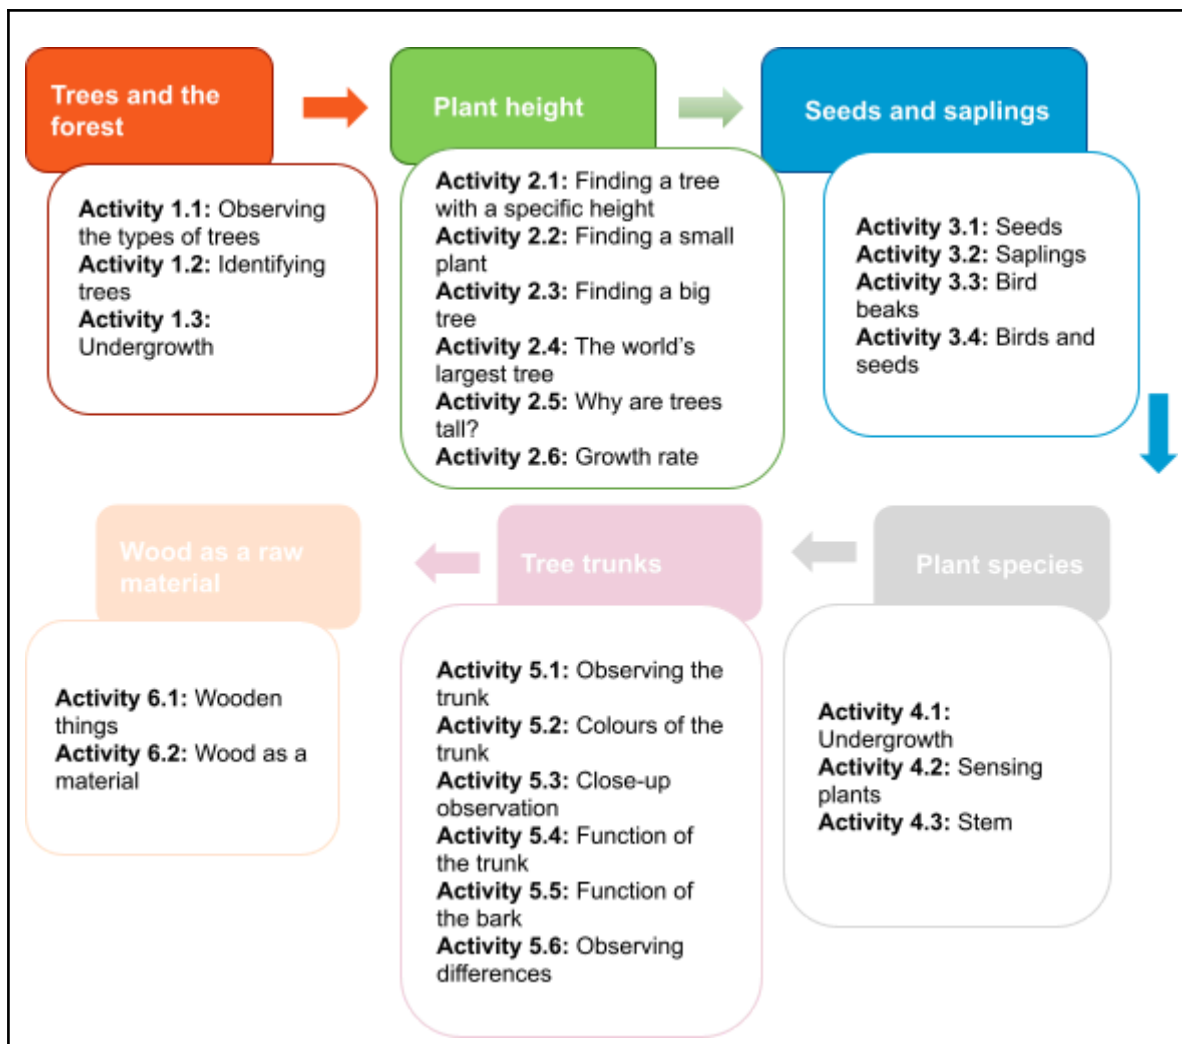

No essential prior knowledge is expected.

The participants will be divided into groups of two to four people.

Motivating framework (narrative, context): A framework story of an owl can be used as motivation. In the trail, the owl will ask for help from the students to complete the tasks.

**Flowchart**

### Modules of the trail

#### Content 1 – Trees and forest

#### Activity 1.1 – Observing the types of trees

<b>Site conditions/information</b>	A location with different tree species (deciduous trees or coniferous trees).
<b>Duration</b>	1 minute
<b>Description of the activity</b>	Assess whether there are more deciduous trees or coniferous trees in the forest.  Free text

#### Content 1 – Trees and forest

**Activity 1.2 – Identifying trees**

<b>Site conditions/information</b>	A location with different tree species (deciduous trees or coniferous trees).
<b>Duration</b>	3 minutes
<b>Description of the activity</b>	What different types of trees can you identify?  Free text

**Content 1 – Trees and forest****Activity 1.3 – Undergrowth**

<b>Site conditions/information</b>	A location with different tree species (deciduous trees or coniferous trees).
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	What kind of undergrowth grows in the forest?  Multiple-choice question (one or several answers can be correct)  1) shrub layer (e.g. blueberries, lingonberries, heather) 2) mosses and lichens 3) ferns and/or horsetails 4) spring bloomers (e.g. wood anemone and hepatica)

**Content 2 – Plant height****Activity 2.1 – Finding a tree with a specific height**

<b>Site conditions/information</b>	Introduction by the owl: Great! You have been a lot of help to me. I wonder if you could next help me to understand how trees grow so tall. I really appreciate that feature of the trees because I like to look at the forest from the heights!  A location with different-sized trees
------------------------------------	---

<b>Duration</b>	10 minutes
<b>Description of the activity</b>	Find a plant that is your height. Take a picture of the plant.  Photo answer
<b>Content 2 – Plant height</b>	
<b>Activity 2.2 – Finding a small plant</b>	
<b>Site conditions/information</b>	A location with different-sized trees
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	What is the smallest plant you can find? Take a picture.  Photo answer
<b>Content 2 – Plant height</b>	
<b>Activity 2.3 – Finding a big tree</b>	
<b>Site conditions/information</b>	A location with different-sized trees
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	What about the biggest plant? Take a picture.  Photo answer
<b>Content 2 – Plant height</b>	
<b>Activity 2.4 – The world's largest tree</b>	
<b>Site conditions/information</b>	Any location
<b>Duration</b>	2 minutes

<p><b>Description of the activity</b></p>	<p>How tall is the tallest tree in the world?</p> <p>Multiple-choice question (one correct answer)</p> <p>1) 52 metres 2) 84 metres 3) 115 metres (correct) 4) 304 metres</p> <p>Explanation: The tallest tree in the world is the giant redwood (<i>Sequoia sempervirens</i>) in California. Known as Hyperion, the tree is 115.56 meters tall, according to one measurement. The largest tree in the world by volume is the sequoia, also in California. It is 84 metres tall, but has a thicker trunk than the Hyperion.</p>
---	---

**Content 2 – Plant height**

**Activity 2.5 – Why are trees tall?**

<p><b>Site conditions/information</b></p>	<p>A location with different-sized trees</p>
<p><b>Duration</b></p>	<p>2 minutes</p>
<p><b>Description of the activity</b></p>	<p>Why do trees grow so tall compared to lower plants?</p> <p>Multiple-choice question (one correct answer)</p> <p>1) They compete for light by growing their leaves as high as possible (correct) 2) To provide as much living space as possible for animals nesting in trees 3) Because they get so much food from the soil with their large roots</p> <p>Explanation: Plants use sunlight as their source of energy (like humans use food). This is why they have to maximise the amount of light they can get and usually grow as high as needed.</p>

**Content 2 – Plant height**

**Activity 2.6 – Growth rate**

<b>Site conditions/information</b>	A location with different-sized trees
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	<p>In Finland, pine trees mainly grow tall in June. How fast are pines currently growing in southern and central Finland?</p> <p>Multiple-choice question (one correct answer)</p> <p>1) 1–2 cm per day (correct)  2) 1–2 cm per week  3) 1–2 cm per month</p> <p>Explanation:  On average, the height increment period lasts about one and a half months, with the peak growth rate in June being influenced by favourable temperature and precipitation conditions.</p>

**Content 3 – Seeds and saplings**

**Activity 3.1 – Seeds**

<b>Site conditions/information</b>	<p>A site with different tree seeds to be found or seen</p> <p>Introduction by the owl: Great! You have been a lot of help to me. Could you next help me understand how trees really grow and where they originate from? Next, you will need precise vision like I have.</p>
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	<p>Look around you for plant seeds. Take a picture of one of the seeds you found.</p> <p>Photo answer</p>

**Content 3 – Seeds and saplings**

**Activity 3.2 – Saplings**

<b>Site conditions/information</b>	A site with different tree seeds to be found or seen
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	Look around you for tree saplings. Take a picture of one sapling.  Photo answer

**Content 3 – Seeds and saplings**

**Activity 3.3 – Bird beaks**

<b>Site conditions/information</b>	A site with different tree seeds to be found or seen
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	Next, you will see pictures of birds' beaks. Think about what kind of food the birds eat.  What kind of food does this bird eat?  Free text  Pictures  

**Content 3 – Seeds and saplings**

**Activity 3.4 – Birds and seeds**

<b>Site conditions/information</b>	A site with different tree seeds to be found or seen
<b>Duration</b>	10 minutes
<b>Description of the activity</b>	What is the significance of birds for plant seeds?  Free text

**Content 4 – Plant species**

**Activity 4.1 Undergrowth**

<b>Site conditions/information</b>	A site with different plant species
------------------------------------	-------------------------------------

	Introduction by the owl: I usually spend my time in the upper parts of the forest on tree branches, except when I am fishing. Could you explore some of the lower forest vegetation for me?
<b>Duration</b>	1 minute
<b>Description of the activity</b>	Take a picture of one of the undergrowth plants in the forest.  Photo answer
<b>Content 4 – Plant species</b>	
<b>Activity 4.2 – Sensing plants</b>	
<b>Site conditions/information</b>	A site with different plant species
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	Feel the leaf of the plant. How does it feel (e.g. soft, fluffy, waxy)?  Free text
<b>Content 4 – Plant species</b>	
<b>Activity 4.3 – Stem</b>	
<b>Site conditions/information</b>	A site with different plant species
<b>Duration</b>	1 minutes
<b>Description of the activity</b>	What kind of stem does the plant have?  Free text
<b>Content 5 – Tree trunks</b>	
<b>Activity 5.1 – Observing the trunk</b>	
<b>Site conditions/information</b>	A site with different trees  Introduction by the owl: Thanks for your help! Let's get back to the trees again. Us owls do not have hands and arms, so I need your help again!
<b>Duration</b>	3 minute

<b>Description of the activity</b>	Choose one tree. Feel the trunk of the tree. Describe the surface of the trunk using two adjectives.  Free text
<b>Content 5 – Tree trunks</b>	
<b>Activity 5.2 – Colours of the trunk</b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	2 minute
<b>Description of the activity</b>	How many colours can you find on a tree trunk?  Free text
<b>Content 5 – Tree trunks</b>	
<b>Activity 5.3 – Close-up observation</b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	2 minute
<b>Description of the activity</b>	Find the most interesting detail in the frame. Take a close-up photo of it.  Photo answer
<b>Content 5 – Tree trunks</b>	
<b>Activity 5.4 – Function of the trunk</b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	1 minute
<b>Description of the activity</b>	What are the functions of a tree trunk?  Free text
<b>Content 5 – Tree trunks</b>	
<b>Activity 5.5 – Function of the bark</b>	
<b>Site conditions/information</b>	A site with different trees

<b>Duration</b>	1 minute
<b>Description of the activity</b>	What are the functions of tree bark?  Free text
<b><i>Content 5 – Tree trunks</i></b>	
<b><i>Activity 5.6 – Observing differences</i></b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	2 minute
<b>Description of the activity</b>	Find another tree with a trunk different from the first tree. How do the trunks differ?  Free text
<b><i>Content 6 – Wood as a raw material</i></b>	
<b><i>Activity 6.1 – Wooden things</i></b>	
<b>Site conditions/information</b>	A site with different trees  Introduction by the owl: As you have probably realized, insects, birds, and for example squirrels benefit greatly from trees, and trees also from them. I have heard that humans have also taken a liking to trees, even though they do not nest in them. Can you help me understand how you humans really utilise trees?
<b>Duration</b>	3 minute
<b>Description of the activity</b>	Come up with something new that could be made out of wood.  Free text
<b><i>Content 6 – Wood as a raw material</i></b>	
<b><i>Activity 6.2 Wood as a material</i></b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	2 minute
<b>Description of the activity</b>	Consider what good and bad aspects there are in using wood as a raw material. Please write.

	Free text
--	-----------

## EXAMPLE TRAIL Finland 2: Different senses

<b>Name of the trail:</b>	<b>Using different senses in the forest</b>
<b>How to find it on Avastusrada:</b>	<a href="https://kool.avastusrada.ee/admin/map/using-different-senses-in-the-forest">https://kool.avastusrada.ee/admin/map/using-different-senses-in-the-forest</a>
<b>Screenshot:</b>	
<b>Developer:</b>	Anttoni Kervinen, Arja Kaasinen, Laura Korpela, Tarja Lahtinen, Ulla Laitinen, Sari Saukkonen, Topi Turunen
<b>Addressed age group:</b>	Grades 3–6
<b>Addressed dimensions of biodiversity:</b>	Focus on observing trees and other plants in the forest and their interactions with animals and humans
<b>Relevant topics:</b>	Biodiversity of the forest, observational skills, arts
<b>General overview and aim:</b>	<p>The aim of the trail is for the students to</p> <ol style="list-style-type: none"> <li>1) use different senses to observe and engage with the environment</li> <li>2) practice arts skills in nature</li> <li>3) connect with natural environment in diverse ways</li> </ol>

**Framework conditions:**

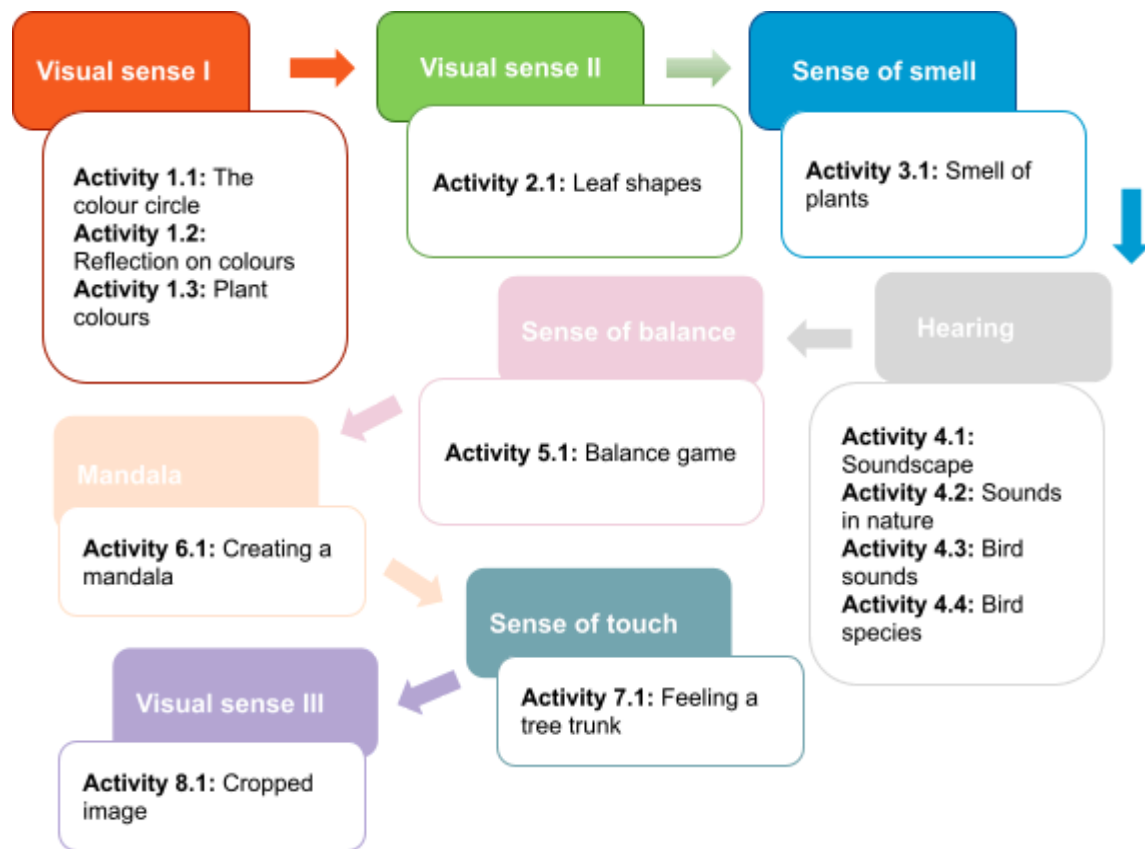

Time: about 1 hour

Equipment required: Mobile phones or tablets with internet access for all participants, a printed and laminated colour circle (optional)

No essential prior knowledge is expected.

The participants will be divided into groups of two to four people.

**Flowchart**

**Modules of the trail**

*Content 1 – Visual sense I*

**Activity 1.1 – The colour circle**

<b>Site conditions/information</b>	Location with different vegetation and understorey plants
<b>Duration</b>	8 minutes
<b>Description of the activity</b>	Look for different-coloured things in the environment. Can you find every colour in the colour wheel? Assemble the things you find into a colour circle on the ground and take a picture.  Photo answer

**Content 1 – Visual sense I****Activity 1.2 – Reflection on colours**

<b>Site conditions/information</b>	Location with different vegetation and understorey plants
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	What are the most common colours in the environment? Why?  Free text

**Content 1 – Visual sense I****Activity 1.3 – Plant colours**

<b>Site conditions/information</b>	Location with different vegetation and understorey plants
<b>Duration</b>	2 minutes
<b>Description of the activity</b>	Why are plants mostly green?  Multiple-choice question (one correct answer)  1) Plants absorb green light and reflect other colours. 2) Chlorophyll, the pigment in plant cells, absorbs blue and red light and reflects green light. (correct)

	<p>3) Plants have a high concentration of water in their tissues, which gives them a green hue.</p> <p>Explanation: Plants are mostly green because chlorophyll, the pigment in their cells, absorbs blue and red light for photosynthesis and reflects green light, making the plants appear green to our eyes.</p>
--	--

### **Content 2 – Visual sense II**

#### **Activity 2.1 – Leaf shapes**

<b>Site conditions/information</b>	A location with understorey vegetation
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	<p>Use a stick to make a square on the ground (for example 1 m × 1 m). Count how many different shapes of plant leaves you can find. Take pictures of the different leaf shapes.</p> <p>Photo answer</p>

### **Content 3 – Sense of smell**

#### **Activity 3.1 – Smell of plants**

<b>Site conditions/information</b>	A site with different vegetation
<b>Duration</b>	4 minutes
<b>Description of the activity</b>	<p>Take the plant parts in your hand and rub them between your fingers. How would you describe the scents of the different plants? Write down different words.</p> <p>Free text</p>

### **Content 4 – Hearing**

<b>Activity 4.1 – Soundscape</b>	
<b>Site conditions/information</b>	Any site with (nature) sounds
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	Draw the surrounding soundscape on the ground with a stick, or paint the soundscape with water and a brush on the stone surface. Take a picture.  Photo answer
<b>Content 4 – Hearing</b>	
<b>Activity 4.2 – Sounds in nature</b>	
<b>Site conditions/information</b>	Any site, preferably with trees, sticks, and rocks around
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	In small groups, make rhythms with either body parts or natural materials, so that everyone’s rhythm is different. Combine the rhythms. Present to others and take a photo of the performance.  Photo answer
<b>Content 4 – Hearing</b>	
<b>Activity 4.3 – Bird sounds</b>	
<b>Site conditions/information</b>	A site with birds around
<b>Duration</b>	3 minutes
<b>Description of the activity</b>	What different bird sounds can you hear? Count all the different types of bird sounds.  Free text
<b>Content 4 – Hearing</b>	
<b>Activity 4.4 – Bird species</b>	
<b>Site conditions/information</b>	A site with birds around

<b>Duration</b>	5 minutes
<b>Description of the activity</b>	How many different species did you identify? Was one dominant? You can use Bird NET or other apps.  Free text
<b>Content 5 – Sense of balance</b>	
<b>Activity 5.1 – Balance game</b>	
<b>Site conditions/information</b>	A site with vegetation, rocks, and different surfaces
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	Practice combining your sense of balance and your sense of sight. Agree on an area to move around in. Just walk along tree roots, stumps, stones, or tracks you have drawn on the ground. If you fall on the ground, you sink into the swamp and are out of the game. Take a photo of the playground.  Photo answer
<b>Content 6 – Mandala</b>	
<b>Activity 6.1 – Creating a mandala</b>	
<b>Site conditions/information</b>	A site with vegetation (dead or alive) and natural objects that can be collected
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	Making a nature mandala. Make a nature mandala from plant parts and stones that have fallen to the ground. Take a picture.
<b>Content 7 – Sense of touch</b>	
<b>Activity 7.1 – Feeling a tree trunk</b>	
<b>Site conditions/information</b>	A site with different trees
<b>Duration</b>	5 minutes
<b>Description of the activity</b>	This exercise is done in pairs. Close your eyes. Your partner will take you to a tree. Feel the tree, hug it and smell it. Can your arms reach around the tree? Is the surface smooth, rough,

	<p>knotty, coarse...? Describe it. Then, your partner will take you back.</p> <p>Open your eyes. Try to recognise the tree that you just hugged. Take a picture.</p> <p>Photo answer</p>
<b>Content 8 – Visual sense III</b>	
<b>Activity 8.1 – Cropped image</b>	
<b>Site conditions/information</b>	A site with sticks around
<b>Duration</b>	3 minutes
<b>Description of the activity</b>	<p>Find three sticks. Place them in your hand so that a small triangular window forms between the sticks. Look at your surroundings through the window. Choose an interesting view. Use your phone to take a picture of your chosen view through the window formed by the sticks.</p> <p>Photo answer</p>
